Safe Harbor

Each of the presentations today will contain forward-looking statements about our strategies, products, future results, performance or achievements, financial, operational and otherwise, including statements about our strategic priorities, business model transition, and guidance for the first fiscal quarter and fiscal year 2019; our long term financial and operational goals; our M&A strategy; our capital allocation initiatives; and our stock repurchase program. These statements reflect management’s current expectations, estimates and assumptions based on the information currently available to us. These forward-looking statements are not guarantees of future performance and involve significant risks, uncertainties and other factors that may cause our actual results, performance or achievements to be materially different from results, performance or achievements expressed or implied by the forward-looking statements contained in these presentations, such as a failure to maintain ARR, ARPS, subscriptions, billings, revenue, deferred revenue, operating margins and cash flow growth; difficulty in predicting those financial and performance metrics; failure to maintain spend management; failure to successfully manage transitions to new business models and markets, including our efforts to expand in construction and manufacturing, convert customers to subscription plans, and attract customers to our cloud-based offerings; failure to successfully expand adoption of our products; and negative developments in worldwide economic or political conditions.

A discussion of factors that may affect future results is contained in our most recent Form 10-K and Form 10-Q filings available at www.sec.gov, including descriptions of the risk factors that may impact us and the forward-looking statements made in these presentations. The forward-looking statements made in these presentations are being made as of the time and date of their live presentation. If these presentations are reviewed after the time and date of their live presentation, even if subsequently made available by us, on our website or otherwise, these presentations may not contain current or accurate information. We disclaim any obligation to update or revise any forward-looking statement based on new information, future events or otherwise.

Non-GAAP Financial Measures

These presentations include certain non-GAAP financial measures. Please see the section entitled “Reconciliation of GAAP Financial Measures to non-GAAP Financial Measures” in the Appendices attached to the presentations for an explanation of management’s use of these measures and a reconciliation of the most directly comparable GAAP financial measures.
## Fiscal Year 2019 Outlook is Unchanged

Fueling Near-Term Growth

ARPS Growth
Core Subscription Volume Growth
Free Cash Flow Build
Fueling Near-Term Growth

ARPS Growth

Core Subscription Volume Growth

Free Cash Flow Build
ARPS Growth
Several factors driving higher core ARPS

- Growing renewal base
- Increasing direct sales mix
- Product mix shift to Collections
- Lower discounts on promotions
Growing Renewal Base

The growing base of renewal subscriptions at lower partner margins drives higher ARPS

Higher net price realization on renewals
- ~10 ppt lower partner margin compared to new sale

Excludes EBA and cloud subscriptions
Increasing Direct Sales Mix

- FY18
- FY20
- Future State

Conceptual representation

Direct
Indirect
Increasing Direct Sales Mix

FY18
FY20
Future State

- Direct
- Digital
- Indirect

Conceptual representation
Product Mix Shift to Collections

New product subscriptions and M2S drive adoption of Collections

- Collections mix of new product subs approaches historical suites levels
- Percent of eligible M2S customers upgrade to Collections
  - Q2 ~1/4
  - Q3 ~1/3
  - Q4 >1/3
- Collection subscriptions grew >60% y/y
Lower Discounts on Promotions

Decreasing legacy promotion discounts drives higher ARPS
Total ARPS Inflection Led by Core

Growth trend will continue beyond FY20
Fueling Near-Term Growth

ARPS Growth

Core Subscription Volume Growth

Free Cash Flow Build
Core Subscription Volume Drivers

- Organic growth in core markets
- Continued growth in enterprise business
- Non-subscriber conversion (legacy)
- Non-paying user conversion (piracy)
Organic Growth in Core Markets

FY20 TAM

Overall CAD markets expanding at ~8% CAGR

$12B + $16B = $28B

Architecture & Engineering Design

Manufacturing Design & Engineering

Core Design Market

Sources: Cambashi and Oxford Economics. The TAM numbers presented are estimates and are likely understated given the impact of piracy rates, availability of free software, in-house development, new uses and other variables.
Growth in Enterprise Business
Moving to EBA drives growth

~2.5x
Increase in subscriptions from maintenance or multi-flex to EBAs

~55%
3-Year (FY15–FY18) CAGR in ARR from EBAs

~45%
Of Named Accounts on EBAs at end of FY18
Non-Subscriber Conversion Opportunity (legacy)

$$1.2M + 0.8M = 2.0M$$

- **Active non-subscribers** (less than 5 releases back)
- **Estimated active non-subscribers** (over 5 releases back)
- **Total estimated active non-subscribers**
Non-Paying User Conversion Opportunity (piracy)

12M
Total non-paying users worldwide

4M
Total non-paying users in mature markets
Strong Overall Growth in Core Subscriptions

- Organic growth in Core markets
- Growth in enterprise business
- Non-subscriber conversion (legacy)
- Non-paying user conversion (piracy)
Fueling Near-Term Growth

ARPS Growth
Core Subscription Volume Growth
Free Cash Flow Build
FY20 Free Cash Flow Build

Non-GAAP net income and change in deferred revenue drive free cash flow

*Non-GAAP to GAAP reconciliations in appendix.*
Net Income Drivers

- Revenue and ARR growth
- Ongoing commitment to spend management
  - Targeted divestments and spend reductions
  - Reallocated investments in strategic priorities

<1% Spend CAGR FY16–FY20

* Non-GAAP to GAAP reconciliations in appendix.
Billings Growth Drives Deferred Revenue

- Organic growth of core business
- Bleed-back of unbilled deferred EBA billings
- Renewal billings grow as base expands
- Mix of multi-year billings approaches pre-transition levels
Bleed-back of Unbilled Deferred EBA Billings

Unbilled deferred revenue from prior years are billed in FY20

- Billings from FY17 deals
- Billings from FY18 deals
- Billings from FY19E deals
Renewal Billings Grow as Base Expands

Recurring billings growth in FY20 is driven largely by renewals

Key drivers of billings increase:

- Higher net price realization on renewals
- Increasing mix shift to Collections
- Growth in multi-year
Multi-Year Billings Revert to Historical Norms

Product subs growth drives increase in mix

- Multi-year maintenance billings mix declined due to M2S and elimination of incentive discount
- Multi-year product subscriptions mix remain near historical levels
- As product subscriptions become a larger proportion of overall Core billings, multi-year billings approaches historical norms
Billings Strength Drives Growth in Deferred Revenue

Long-term deferred revenue builds back to FY18 level

Excludes unbilled deferred revenue
On Track to Free Cash Flow of $1.4B in FY20
Capital Allocation

Uses of cash

- Liquidity and debt management
- Return to shareholders via share buyback
  - More than $1.3B in share repurchases over past two years
  - Reduced share count by ~6M
  - Shifted balance of repurchase activity more toward opportunistic grids vs systematic buying
  - Price savings vs. VWAP of $4.93 per share translates into ~$82M in savings
- Targeted acquisitions in strategic areas
Tax Reform

Tax reform will be beneficial over time

- Results in a lower overall blended tax rate
  - Allows for free movement of capital globally

- Does not provide a near-term cash tax benefit
  - Autodesk will utilize existing U.S. tax attributes through FY21 so no cash tax savings
  - Beyond FY21 we anticipate the lower U.S. rate will provide cash tax savings
Current Non-GAAP Operating Margin Projection

* Non-GAAP to GAAP reconciliations in appendix.
Current Non-GAAP Operating Margin Projection

What changed from last Investor Day?

- ARR growing faster than expected
- Divested from non-core assets
  - Reduced non-recurring revenue by ~$200M
  - Reinvested resources in strategic priorities

* Non-GAAP to GAAP reconciliations in appendix.

Long-Term Growth Drivers: FY21 and Beyond

- Maintain foundation: strong core business execution
- Expand into new markets: construction and manufacturing
- Combination leads to ~$2.4B in free cash flow in FY23
- Focus on sum of revenue growth + free cash flow margin
  - Projected growth range of net 55% to 65% in FY23
Maintain Foundation: Strong Core Business Execution

- ARPS continues to grow with CAGR <5%
  - Base of renewals continues to stack at higher net margin
  - Mix of direct sales continues to increase
  - Mix of higher value Collections continues to grow

- Continue to add new subscriptions
  - Organic growth of design market
  - Growth in EBAs
  - Continued conversion of legacy and piracy opportunity
$10B + $11B

New TAM in Construction by 2020
New TAM in Manufacturing by 2020

Source: Canady and Oxford Economics
The TAM numbers presented are estimates and are likely understated given the impact of piracy rates, availability of free software, in-house development, new uses, and other variables.
What Metric Matters Most?
Free Cash Flow Margin vs. Revenue Multiple

FCF margin vs. revenue multiple is not the best indicator of enterprise value

Source: Factset. Market data as of 3/13/18

Note: ADKS fiscal year (January FYE); fiscal year figures assumed to be equivalent to calendar year figures (i.e. FY 2020 = CY 2019).
Revenue Growth vs. Revenue Multiple

Revenue growth vs. revenue multiple is not the best indicator of enterprise value

Source: Factset. Market data as of 3/13/18
Note: ADK fiscal year (January FYE); fiscal year figures assumed to be equivalent to calendar year figures (i.e. FY 2020 = CY 2019).

R² = 0.16
Revenue Growth + Free Cash Flow Margin vs. Revenue Multiple

Revenue + FCF Margin is a much better indicator of enterprise value

Source: Factset. Market data as of 3/13/18

Note: ADSK fiscal year (January FYE); fiscal year figures assumed to be equivalent to calendar year figures (i.e. FY 2020 = CY 2019).

$ADSK Valuation
$130/share

$R^2 = 0.55$
Key Takeaways

- On track to FY20 goals
  - ARR CAGR increase to 25%
  - ARPS drivers exceeding original expectations
  - Core subscription volume drivers remain strong
  - Ongoing commitment to spend management
  - Free cash flow driven by net income and billings growth

- Continued growth beyond FY20
  - Growth opportunity in the core business
  - Expanding deeper into new market opportunities
  - Focused on sum of free cash flow margin and revenue growth
Reconciliation of GAAP Financial Measures to Non-GAAP Financial Measures (In millions, except per share data)

To supplement our consolidated financial statements presented on a GAAP basis, we provide investors with certain non-GAAP measures including non-GAAP net income per share, non-GAAP operating margin, non-GAAP spend and free cash flow. For our internal budgeting and resource allocation process and as a means to evaluate period-to-period comparisons, we use non-GAAP measures to supplement our consolidated financial statements presented on a GAAP basis. These non-GAAP measures do not include certain items that may have a material impact upon our future reported financial results. We use non-GAAP measures in making operating decisions because we believe those measures provide meaningful supplemental information regarding our earning potential and performance for management by excluding certain expenses and charges that may not be indicative of our core business operating results. For the reasons set forth below, we believe these non-GAAP financial measures are useful to investors both because (1) they allow for greater transparency with respect to key metrics used by management in its financial and operational decision-making and (2) they are used by our institutional investors and the analyst community to help them analyze the health of our business. This allows investors and others to better understand and evaluate our operating results and future prospects in the same manner as management, compare financial results across accounting periods and to those of peer companies and to better understand the long-term performance of our core business. We also use some of these measures for purposes of determining company-wide incentive compensation.

There are limitations in using non-GAAP financial measures because non-GAAP financial measures are not prepared in accordance with GAAP and may be different from non-GAAP financial measures used by other companies. The non-GAAP financial measures are limited in value because they exclude certain items that may have a material impact upon our reported financial results. In addition, they are subject to inherent limitations as they reflect the exercise of judgments by management about which charges are excluded from the non-GAAP financial measures. We compensate for these limitations by analyzing current and future results on a GAAP basis as well as a non-GAAP basis and also by providing GAAP measures in our public disclosures. The presentation of non-GAAP financial information is meant to be considered in addition to, not as a substitute for or in isolation from, the directly comparable financial measures prepared in accordance with GAAP. We urge investors to review the reconciliation of our non-GAAP financial measures to the comparable GAAP financial measures included below, and not to rely on any single financial measure to evaluate our business.

The following slides shows Autodesk's non-GAAP results reconciled to GAAP results included in this presentation.
