March 15, 2005

V+Z Top+ 2006 Provides Ease-of-use and Integration of Swiss Standards

AESCH, Switzerland, March 15 /PRNewswire-FirstCall/ -- Vifian + Zuberbuehler AG today announced support for Autodesk(R) Architectural Desktop 2006, next generation AutoCAD(R)-based building design and documentation software from Autodesk, Inc., the world's leading software and services company for the building, manufacturing, infrastructure, digital media and wireless data services fields. Autodesk Architectural Desktop 2006 helps architects realize their ideas by delivering flexibility in both implementation and use, the efficiency of real-world building objects, and the very best AutoCAD-based design and documentation productivity.

V+Z Top+ 2006 offers customers an ideal combination of global technology and data standards provided by Autodesk Architectural Desktop 2006, as well as addresses Swiss needs in standards, library and functions. With Autodesk Architectural Desktop 2006, architects realize immediate design and documentation productivity.

With Autodesk Architectural Desktop 2006 architects can start working immediately with minimal training, and implement Autodesk Architectural Desktop at their own pace with the familiar working methods and user interface. With the new publish-to-DWF(TM) capability, including intelligent metadata in both 2D and 3D, architects can send fully materialized construction models for the customer to view.

"By integrating with the latest features in Autodesk Architectural Desktop 2006, Vifian + Zuberbuehler AG enables our joint customers to quickly realize increased productivity gains," said Jim Quanci, who heads the global Autodesk Developer Network. "We are enthusiastic to have Vifian + Zuberbuehler AG rapid support for Autodesk Architectural Desktop 2006."

"Vifian + Zuberbuehler values our strategic, long long-term relationship with Autodesk. V+Z has over 22 years of experience in the CAD market, and 20 years working with Autodesk," said Rene Zuberbuehler, CEO of Vifian + Zuberbuehler.
