About Global Clean Energy, Inc.:

Global Clean Energy has been working diligently to become a significant contributor to the future of clean energy. The Company has been active in developing relationships with potential customers for its dredging and gasification systems, and the Company has entered into certain agreements with UK Coal Mining plc. ("UK Coal"), the largest coal producer in the United Kingdom. The Company is currently working with UK Coal to finalize the installation of a proprietary cyclonic dredging pump at UK Coal's Pontefract, South Yorkshire facility. Subject to further testing, the Company expects to commence dredging and processing the slurry and coal fines from the slurry lake in Pontefract, South Yorkshire during the fourth quarter of 2008. A patent application for the Company's proprietary cyclonic dredging pump is currently pending before the U.S. Patent and Trademark Office.
