SAN RAFAEL, Calif., Sep 20, 2010 (BUSINESS WIRE) --

A Photo of Tesla Motors' Model S Pulling Up to its New Home in the Autodesk Gallery at One Market in San Francisco is Available on Business Wire's Web Site and AP PhotoExpress.

Photo Caption: Tesla Motors' Model S gets a lift into the Autodesk Gallery at One Market in San Francisco to begin its one-year exhibition. The Autodesk Gallery at One Market has more than 20 different exhibits regularly on display that showcase the innovative work of Autodesk customers, illustrating the role technology plays in design and engineering. As the Model S combines cleantech and innovation, the exhibit helps showcase the broad base of customers that use Autodesk 3D design, engineering and entertainment software. Tesla Motors' Model S is the first premium sedan to be built from the ground up around an electric powertrain. A perfect blend of form and function, this four-door, five-seater is designed to deliver the smooth, zero-emission acceleration made famous by its predecessor, the Tesla Roadster, without sacrificing its roomy interior and cargo space.
