

Autodesk Software Used for Analyzers That Help Industries Minimize Emissions

Jul 31, 2012

California Analytical Instruments Relies on Autodesk Inventor Software to Help Companies Keep Greenhouse Gases in Check

SAN FRANCISCO--(BUSINESS WIRE)--Jul. 31, 2012-- [Autodesk, Inc.](#) (NASDAQ:ADSK) has named California Analytical Instruments, Inc. (CAI) as the Autodesk July [Inventor of the Month](#) for using [Autodesk Inventor](#) software and other [digital prototyping](#) tools to develop gas analyzers and custom systems that help companies monitor and measure the emission of greenhouse gases.

California Analytical Instruments (CAI) uses Autodesk Inventor software to develop gas analyzers and custom systems that help monitor and the emission of greenhouse gases. (Photo: Business Wire)

breweries and mushroom farms — all of which release significant amounts of methane, a highly potent greenhouse gas. CAI's analyzers are capable of detecting methane — as well as other dangerous gases including carbon dioxide, ammonia, carbon monoxide and sulfur dioxide — to within just a few parts per million.

"The United States has set the worldwide standard for implementing regulations to minimize emissions, and increasingly lower measurement levels will require new and more sensitive technologies," said Frank Smith, Senior Vice President of Sales and Marketing for CAI. "CAI plans to be at the forefront of development of new products to meet these requirements, and continued use of tools such as Autodesk Inventor will play a major role in keeping our projects both on schedule and cost effective."

Digital Prototyping Saves Time and Money

Collaborating closely with Autodesk Gold Partner and reseller KETIV, CAI builds its analyzers relying primarily on Autodesk Inventor software as part of [Autodesk Product Design Suite](#) and [AutoCAD Electrical](#) software. The interoperability between the software programs allows CAI to design all aspects of a custom analytical system, ranging from the console that houses the analyzer, to the motor that powers it, to various pumps, I/O monitors and other ancillary equipment.

When designing its FTIR analyzer — a complex system that relies in part on infrared waves and concave mirrors to measure gas levels — CAI was able to validate the mirror system entirely within the Inventor environment. As a result, CAI avoided having to build multiple physical prototypes, a projected savings of \$5,000 per prototype.

"With Digital Prototyping tools from Autodesk, CAI is able to innovate on behalf of its customers in less time and with less overall cost," said Brenda Discher, vice president, Manufacturing Industry Strategy and Marketing at Autodesk. "This puts CAI's analyzers in the hands of customers sooner, giving them the tools *they* need to lessen their impact on the environment, helping to create a path to a greener future."

About the Autodesk Inventor of the Month Program

Each month, Autodesk selects an Inventor of the Month from the users of Autodesk Inventor software, which takes manufacturers beyond 3D to Digital Prototyping. Winners are chosen for engineering excellence and groundbreaking innovation. For more information about Autodesk Inventor of the Month, visit www.facebook.com/adskinventor.

About California Analytical Instruments, Inc.

Headquartered in Orange, California, California Analytical Instruments, Inc. has been providing quality gas analyzers & systems used in Industrial, Environmental, Process and Automotive Emissions applications for 30 years. For additional information, visit www.gasanalyzers.com.

About KETIV

KETIV is a business consulting firm that helps people build better products by providing tools, training and support to facilitate informed decisions in the earliest stages of development. KETIV's clients are changing the world through innovation, clean technology and sustainable design. Founded in 1983 as one of the first AutoCAD resellers in the country, KETIV is a leading Autodesk solutions partner and an authorized Mentor Graphics distributor, delivering comprehensive CAD/CAM software and services. KETIV has California offices in Fullerton, Burbank and San Jose; an office in Portland, Ore.; and an office in Phoenix, Az. An award-winning and recognized leader in its field, KETIV serves businesses across the country and around the world. For additional information, visit www.ketiv.com.

About Autodesk

Autodesk, Inc., is a leader in professional and personal [3D design](#), engineering and entertainment software. Autodesk tools help unlock the creativity in everyone, from children and hobbyists to design and engineering professionals. Customers across the manufacturing, architecture, building, construction, digital art and entertainment industries, including the last 17 Academy Award winners for Best Visual Effects, use Autodesk software, mobile apps, cloud services and communities to design, visualize, simulate and communicate their ideas. For more information follow [@autodesk](#) or visit autodesk.com.
