move data across multiple systems further strengthens the value of Autodesk PLM 360, making the benefits of PLM available to anyone, anytime, anywhere.

"The combination of Autodesk PLM 360 and Jitterbit's next generation cloud integration solutions allows companies of all sizes to realize a greater return on their technology investments in ERP, CRM or other proprietary business applications," said George Gallegos, CEO at Jitterbit. "Companies will now have the ability to gather, analyze and utilize product or project data in a far more efficient manner than previously possible."

"Autodesk PLM 360 Connect is a straightforward and cost-effective way to keep Autodesk PLM 360 tightly connected with data from other critical business systems," said Buzz Kross, senior vice president, Design, Lifecycle and Simulation at Autodesk. "Jitterbit is a natural partner to match our nimble cloud-based approach. Our customers require integration that is powerful, quick, easy-to-use, and affordable."

Application Integration Simplified

The combination of cloud-based PLM with a cloud-based enterprise application interface platform makes it easy for customers to map, build and manage an elegant integration solution in any application environment. Jitterbit's intuitive graphical user interface means no software coding is required for integration. This "no coding" approach makes connections simple and easy to build and maintain for business analysts and administrators alike.
